

## Biocidin<sup>®</sup>, Biocidin<sup>®</sup> LSF & *Borrelia burgdorferi*

Effective killing of *Borrelia burgdorferi* in vitro with novel herbal compounds

### Biocidin<sup>®</sup> LSF Sinus Rinse

Place 8 oz. of non-chlorinated water such as distilled or spring water, into a glass jar with 1 packet of the saline powder and mix well. Some users have found that warming the water helps to dissolve the powder more quickly. This mixture will be good for 8 refills of the nasal spray bottle.

Place 2 pumps of Biocidin<sup>®</sup> LSF in the 1 oz. nasal spray bottle and fill the bottle with the saline solution, leaving a small amount of space at the top of the spray bottle for mixing. Shake well.

Spray 2-4 times in each nostril while inhaling through the nose gently, and then tip the head back until the mixture is felt / tasted at the back of the throat. Repeat this process 3-4 times per day. Discard the remaining mixture after 5 days, rinse the nasal spray bottle and sprayer tip well with warm water and refill with the saline solution and Biocidin<sup>®</sup> as directed above.

Discontinue use if irritation or adverse reaction occurs.

## Mycotoxins Testing Companies

RealTime Laboratories  
Great Plains Laboratory

## Mycotoxins Treatment Strategy

1. Get Out/Remediate
2. Toxin-specific binders
  - a. G.I. Detox<sup>TM</sup>+ covers most
  - b. Consider cholestyramine for Ochratoxin A
  - c. Consider *Saccharomyces boulardii* and NAC for Gliotoxins
  - d. Consider fiber, such as TruFiber
3. Intranasal treatment, including intranasal Biocidin<sup>®</sup> LSF
4. Systemic treatment, delivered orally, including Biocidin<sup>®</sup> LSF
5. Detoxification and other support as needed
